Land Services

Land Services has gone through multiple phases of reorganization and restructure, with the goals of service, value and results in mind.

The land services department is made up of three areas:

- o Assessing Services
- o Customer Services
- o Environmental Services.

Accomplishments in 2019

1. Conversion to iAS World Tax/CAMA system
2. Conversion to Eagle Recording software
3. Hired approximately 70 AIS watercraft inspectors in house for the first time
4. Near completion of construction of Cell 5 at the landfill
5. Maintaining a 98% positive overall score from our 2,203 surveys in 2019 with a 34% turnover.

Land Services is able to utilize non-levy funds to pay for credit card fees, software licensing, our remonumentation project, maintenance of our tax forfeited lands, county parks, and trails. Utilizing these funds allows us to reduce our levy draw. Increase in levy need was due to the departure from Crosslake Planning and Zoning contract, causing a loss in revenue to cover the two positions.

According to requirements established by MN Statutes, we are required to appraise all new construction every year and review all properties at least once every five years. (See quintile map on page 8) In 2019, this would have been approximately 9,000 parcels and we assessed 11,007.

Tax Forfeited Fund

The Tax Forfeited fund is a statutorily mandated fund that is used to account for all revenues and expenditures related to the forfeiture and sale of delinquent properties, repurchase of delinquent properties, sale of timber and timber permits. Only expenditures that are directly related to these duties are allowed to be accounted for in this fund. Each year, it is required to settle out to the other taxing entities any revenues that were collected over the expenditures, or the net proceeds.

Solid Waste provides technical assistance to cities, townships, organizations, private business and county government in the implementation of the county's integrated solid waste management program. This program encompasses a broad range of elements; waste reduction, waste education, recycling, yard waste facility, county sanitary landfill, county construction & demolition landfill, closed county landfill, used tires, used electronics, used mattresses, appliances, used oil and lead acid battery program, household hazardous waste and product exchange facility, solid waste ordinance, and unauthorized solid waste disposal.

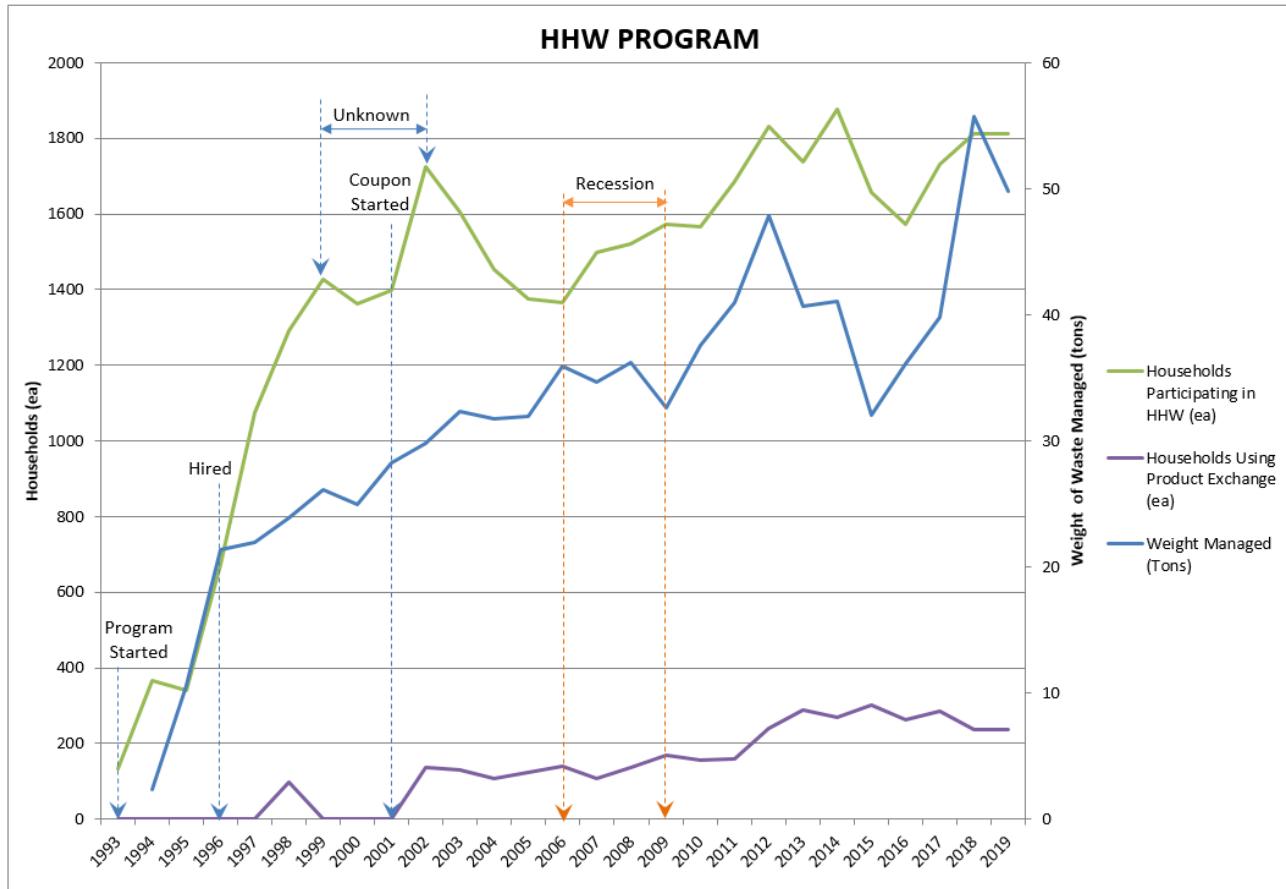

Landfill Collections

- 51,997 tons of garbage in sanitary landfill
- 7,498 cubic yards of waste in the demolition landfill
- 3,977 appliances recycled
- 6,668 pieces of furniture

Household Hazardous Waste Program (HHW)

The second Wednesday, and second Saturday of each month from May through September, and first Wednesday and Saturday in October are HHW drop off days. Winter months are by appointment only.

- In 2019 we had 1,447 vehicles to the HHW site to drop off hazardous materials. This was a decrease of 11% from 2018.
- Latex paint was the item most disposed of at 61, 55-gallon drums
 - Second being oil paint with 34, 55-gallon drums.
- 197 household participated in the product exchange program in 2019.

Electronics

- 7,454 residential electronics recycled
- 13.6 tons of business electronics recycled through two Business Electronics events held in 2019

Mattresses

In 2019 the landfill recycled 4,600 mattresses. Mattresses were sent to Greenforest Recycling and Goodwill, where they were disassembled and recycled.

Cell 5 construction

Excavation of Cell 5 began in 2018. In 2019 the clay, plastic liner, leachate collection, and gas collection systems were installed, with plans for Cell 5 to be fully functional in 2020. Other items include the construction of Leachate Pretreatment Pond 5, excavation of future Demolition Landfill Phase 3, partial closure of MSW Landfill Cells 1 & 2, and partial closure of Demolition Landfill Phase 2.

Leachate Management

The County currently has two options to dispose of treated leachate: land application on the field adjacent to the treatment ponds, and at municipal wastewater treatment plants. Land application has been the primary option since 1996. However, recent water quality standards for emerging contaminants such as perfluoro-compounds (PFCs) and Boron may add restrictions to both of these options in the next 5 years. Therefore, the County entered into an agreement with HTX Solutions, LLC in 2019 in an effort to cost effectively treat leachate to meet water quality standards.

- HTX treats water mainly through an electrochemical unit as well as carbon and ion-exchange filtration
- Filtration meets all treatment standards, but it is costly. The goal is for the electrochemical unit to handle the majority of treatment needs
- HTX processed 286,000 gallons of water through the electrochemical unit and was successful in removing long chain PFC's and many other contaminants
- The unit struggled to remove shorter chain PFC's as well as Boron
- HTX has identified 150 improvements that they will be making to their process for 2020
- HTX is targeting 6 million gallons for treatment in 2020
- The Landfill typically sprays 8-10 million gallons per year on the 36 acre land application field
