Comments

The timing of the event was difficult. Crews were in working but the snow didn't start impacting traffic until 2 PM on 10-20-20. The plows plowed until 9 PM 10-20-20 and then rested until 3 AM 10-21-20. The event ended at 12 AM 10-21-20, resulting in not meeting many of our plowing targets because of the event ending when our operators needed required rest.

Summary

Roads cleaned up with minimal salt use. Road temps stayed warm, leading to bare lanes by just scraping the roads the morning of 10-21-20.

Decisions Made

Plows began plowing around 2 PM 10-20-20. They applied 200 lbs of salt to keep the snow melting and sticking to the roads. We ended plowing at 9 PM 10-20-20 for required rest. We began plowing at 3 AM 10-21-20. The roads cleaned up well and by daybreak we sopped applying material because the road surfaces were not slippery after simply plowing.

Lessons Learned

Roads cleaned up well by just plowing. Salt application on 10-20-20 may have been a benfit that prevented the snow from bonding to the road's surface and allowed for quick clean up on 10-21-20.
