

August 29, 2025

Dear Prospective Bidders,

Crow Wing County will be hosting a sealed bid auction for the enclosed timber appraisals.

The sealed bid auction results notification of only the high bidder will be held at **10:00 am on Friday September 26th, 2025**, in the Land Services Office. Bids will be opened the morning of September 26th, 2025, prior to 10:00 am and witnessed by department personnel.

Bids for appraisals must be submitted to our office **before 4:00 pm on Thursday September 25th, 2025**. Bids can be mailed to this office, delivered in person or placed in the drop box located just outside the main lobby doors in front of the Land Services Building located at 322 Laurel Street in Brainerd.

After all Down Payments have been made, full auction results may be obtained by phone or email, and will be posted on the county website by 2:00 pm on Friday October 10th, 2025, at the following link:
<https://www.crowwing.gov/267/Timber-Auctions>

If you have any questions, please feel free to contact our office at 218-824-1138.

Sincerely,

Tom Strack

Tom Strack
Environmental Services Supervisor
322 Laurel Street, Suite 15
Brainerd, MN 56401
Office: 218-824-1138
Email: Tom.Strack@crowwing.gov

Our Vision: Being Minnesota's favorite place.

Our Mission: Serve well. Deliver value. Drive results.

Our Values: Be responsible. Treat people right. Build a better future.

CROW WING COUNTY LAND COMMISSIONER'S

Notice of County Timber Stumpage Sale

SEALED BID AUCTION

Pursuant to the order of the County Board of Crow Wing County and under the provisions of Minnesota Statutes 282.04, Chapter 355, Laws of 1941, as amended, and under the provisions of the Timber Sale Policy adopted by the Crow Wing County Board of Commissioners on January 11, 2005, the following timber on tax forfeited lands will be offered for sale without the sale of land on **Friday, September 26, 2025**.

The sale of timber will be via a **SEALED BID AUCTION** with SEALED BIDS to be delivered to Crow Wing County Land Services, 322 Laurel Street, Suite 12, Brainerd, Minnesota 56401, **on or before 4 p.m. on September 25, 2025**, Bids will be opened the morning of September 26th prior to 10:00 am and will be witnessed by department personnel. The sealed bid auction results notification of only the high bidder will be held at 10:00 am on Friday September 26, 2025 in the Land Services Office Oak Room.

The SEALED BID AUCTION is subject, in part, to the following conditions:

1. Prospective bidders should request maps, cutting regulations, contract information and special regulations from Land Services or go on-line at: www.crowwing.gov to view appraisal tracts. Some tracts may have special requirements. Cutting shall be in conformity with the forestry practices as outlined in permit / appraisal.
2. Timber will be sold to the highest bidder, but for not less than the total appraised tract value. A **percent bid** must be indicated for the total appraised tract value. This percent will be applied to each bid species. Percent Bid shall be on a percentage basis in multiples of one (1) percent. Crow Wing County reserves the right to accept or reject any or all bids.
3. All bid forms must be received in the Land Services office no later than 4 p.m. on September 25, 2025. **All bids must be on the official bid form attached below.**
4. One **\$300.00 Bid Guarantee** in the form of personal check payable to the Crow Wing County Treasurer is required to provide a "bid guarantee" for bidding on all tracts. Failure to enclose the \$300 Bid Guarantee with your bid will result in rejection of your bid. For successful bidders, the Bid Guarantee will be applied to the down payment. Bid Guarantees submitted by unsuccessful bidders will be returned.
5. Successful bidders will have **10 days** (October 6th, 2025: 4pm) to submit a check, payable to the County Treasurer, for **15%** of the appraised tract value. Failure to make the appropriate down payment within the specified timeframe will result in forfeiture of the bid guarantee. Successful bidder will be notified by mail.
6. If the successful bidder does not submit the appropriate down payment within the allotted timeframe, the sale will be awarded to the next highest bidder. In case of tie bids, the successful bidder will be decided by the toss of a coin by the Land Services Director or Environmental Services Supervisor.

GENERAL TERMS AND CONDITIONS

- a. Bidding shall be on a percentage basis in multiples of one (1) percent. The bidder with the highest bid raise will be awarded the sale. The right to accept or reject any or all bids is reserved by Crow Wing County.
- b. Tracts not sold through the sealed bid are available for sale at the appraised price under the terms and conditions as stated in the sale offering/timber appraisal until such time as withdrawn from sale.
- c. At the discretion of staff, minor, incidental species may be designated as "nonbid" species which will not be affected by the bid raise.
- d. Successful purchaser of an auction tract must make a minimum down payment of 15% of the appraised value within 10 days of the sale.

- e. Upon receipt of 15% down payment, permittee is allowed to construct landings and/or access trails, if desired. Before harvest operations commence, permittee must **schedule an on-site, prework meeting with contract administrator**, and must pay balance of sale/block in full, plus an additional 10% of the appraised value of the total sale which will be deposited as a Performance Guarantee and refunded only after satisfactory completion of sale and repair of access roads and trails upon inspection by timber sale administrator. Each block must be paid in full before cutting is allowed.
- f. Any overrun that occurs on a block must be paid in full before purchasing next block.
- g. The 15% down payment will not be used to cover overruns. The 15% down payment will be retained and applied toward payment of final block.
- h. The Land Services Department shall be notified before cutting begins and prior to sale completion. The location of all trails and landings must be approved by Land Services.
- i. No bidder shall act in any capacity on behalf of a non-qualifying person, partnership or company for the purpose of procuring rights to purchase timber from Crow Wing County.
- j. No bid shall be accepted from any bidder having a delinquent or uncollectible timber sale account with the counties or state, or from any bidder involved in a pending timber trespass case with the counties or state.
- k. Past due accounts will be charged interest on the balance equal to the interest rate set by the Minnesota Department of Revenue for tax forfeited land sale contracts.
- l. Timber sale will only be issued in the name identified as the successful bidder. Timber permits will not be transferred to a different individual after the auction, except that, in the case of extreme hardship, a permit may be transferred if approved by the land commissioner providing transfer document is finalized by all parties.
- m. Auction Sales are two (2) years in length unless otherwise noted.
- n. Providing good and sufficient reason is given, one - one (1) year extension is possible for a fee totaling 10% of the uncut volume, based upon bid value.
- o. Failure to activate the sale by paying the balance due before the expiration date of the contract will result in forfeiture of down payment to the County.
- p. Failure to commence cutting, failure to comply with contract regulations, failure to complete the contract within contract period shall result in default of the contract with any credit balance forfeiting to the County.
- q. Failure to comply with Consumer Scale Agreement may result in the disallowance of future Consumer Scale Agreements and may result in timber trespass pursuant to MS 90.301.
- r. Failure to secure an approved Alternate Landing Agreement prior to moving wood off-site may result in disallowance of future Alternate Landing privileges and may result in timber trespass pursuant to MS 90.301.
- s. If payment, in full, for sale/block is provided and if no cutting has occurred on the sale/block, the monies paid, less any down payment paid, may be credited to any other timber contract issued to the contract holder by the county providing the contract holder requests, in writing, that it be credited, provided the request and transfer is made within the same calendar year as the payment was received.
- t. Sustaining Minnesota Forest Resources: Voluntary Site-Level Forest Management Guidelines for Landowners, Loggers and Resource Managers will be implemented on all County managed forest lands.
- u. Liability: The permittee agrees to assume entire responsibility and liability for all damages and injury to all persons and property including County personnel and property whether caused by the permittee, the permittee's officers, agents or employees, arising from activities undertaken on this permit or the permittee's use of occupancy of the premises covered by this permit. The permittee additionally agrees to indemnify and save hold the County, its officers, agents and employees, harmless from all claims or causes of action arising therefrom.
- v. All merchantable timber which is removed to facilitate access to the permit area is to be utilized by permittee with the County being compensated for the value.
- w. All volumes sold are estimates only and cannot be construed as a guarantee or a limitation.

Operability: Winter: November 1 - March 31 Soil Type: Loamy, Poorly Drained

Topography: Level to Rolling Cutting Acres: 35.6

Harvest Specifications

Access
Access is thru public land.

Harvest and Reserves
Type 1 Harvest: Aspen, Birch, Maple and Basswood.
Type 1 Reserve: Oak and Pine.
Type 2 Harvest: 1/3 of the standing volume through an approved Timber Sale Administrator approved method.

Landings, Access Roads, and Skid Trails
Location and construction of any new roads/landings must be pre-approved by the sale administrator. Landing must be located at least 150' away from the non-motorized trail. Only one landing will be approved.
Use only existing access roads.
Trails and landings need to be rehabilitated to a satisfactory condition before performance guarantee is returned.
Some major skid trails or access roads need to be closed and/or blocked following harvesting operations at sale administrator's request.

Cutting, Felling, and Skidding
Utilize all timber felled during road/trail construction.
Damage exceeding 5% of the total residual trees per cutting block constitutes excessive damage and will be charged double stumpage. Damage is defined as injury to 30% or more of the crown or greater than 60 square inches of the layer beneath the bark of any tree.
Reduce stump heights to an average of 12".
Reserve all non-hazardous snags.
Avoid felling timber into areas of regeneration.
Do not fell timber into wetlands or across ownership boundaries.

Site, Soil, and Water Protection
Filter strips along wetlands require <5% soil disturbance.
Incorporate water diversion practices to reduce soil erosion.
If site/soil damage becomes apparent, cease operations and contact sale administrator immediately.

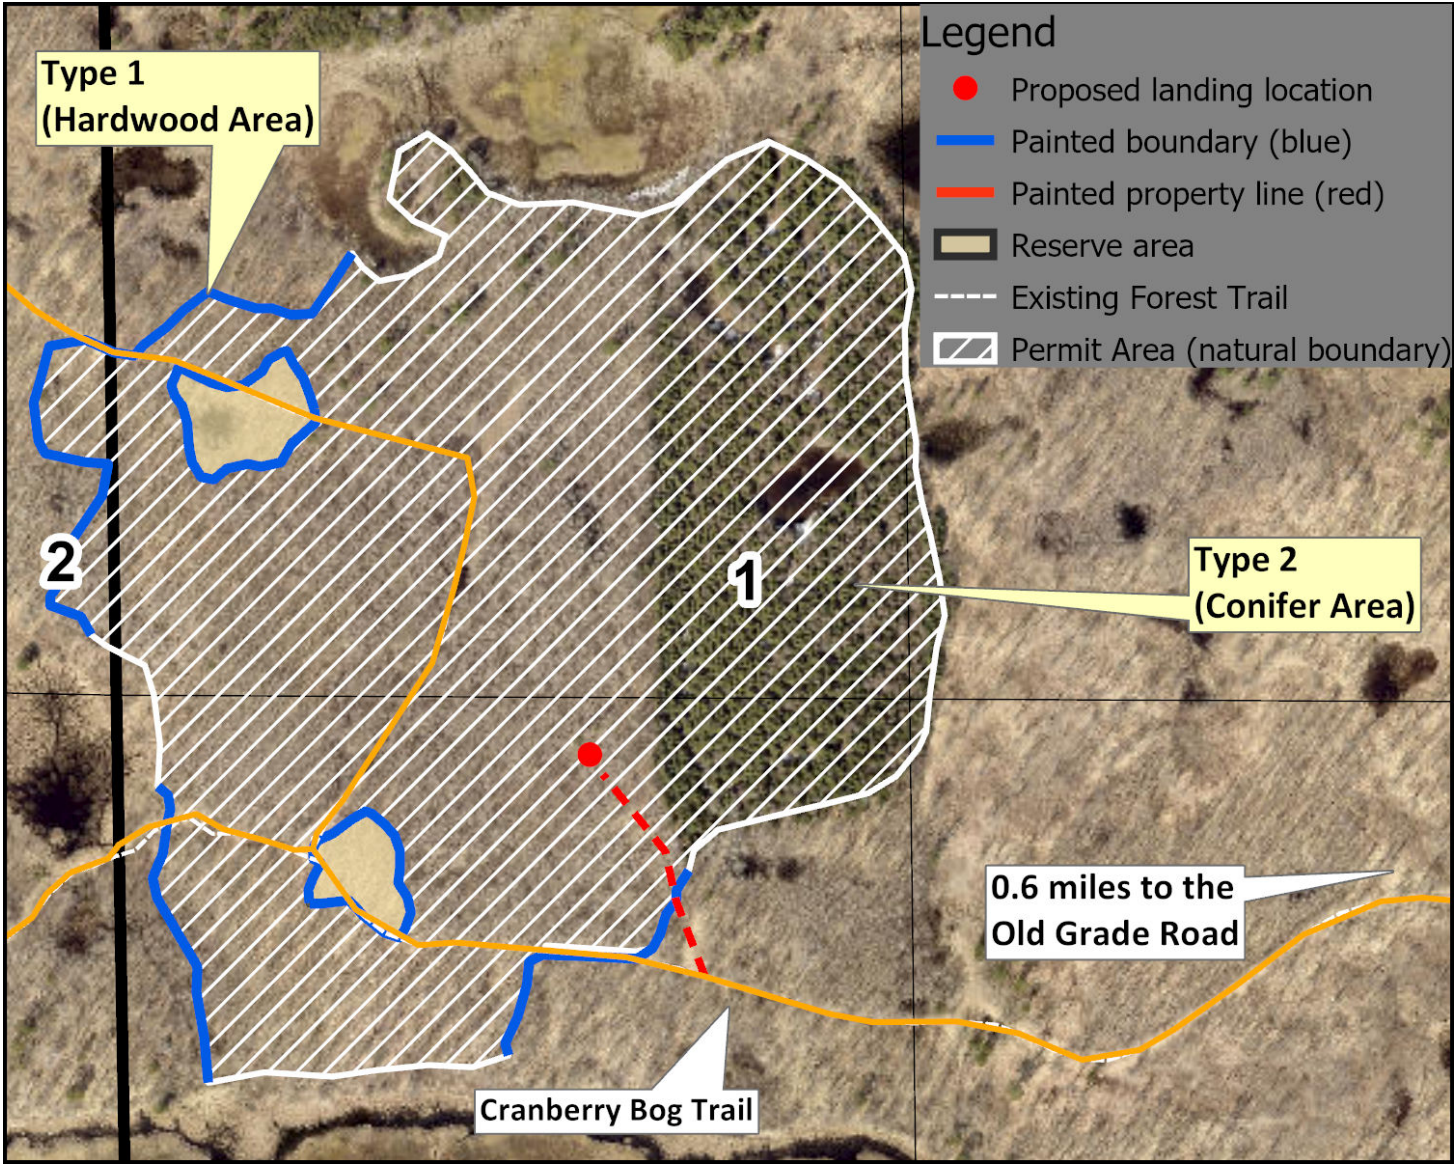

Slash Disposal
Slash may be chipped or must be scattered throughout permit area.
Chipping is to occur either simultaneously or during the same season as harvesting operations.
If chipping, 20% of the tops and limbs must be scattered throughout permit area per Site Level FMGs. This is in addition to incidental breakage.

Tree Size, Marketing, and Special Conditions
Timber must be removed from site by the end of the same season as harvesting operations.
Aspen: 9" DBH - 6 Sticks, Birch: 8" DBH - 4.5 Sticks, Maple: 7" DBH - 3.5 Sticks, Spruce: 9" DBH - 4 Sticks, Tamarack: 8" DBH - 4 Sticks.
Biomass volume is estimated to be 320 tons.

Block 1 Species	Non-Bid	Bolt %	Volume	Units	Unit Price	Value
Oak		9	480	Cords	\$17.00	\$8,160.00
					Subtotal	\$8,160.00
					Total	\$8,160.00

Total MBF: 0 Total Cords: 480

Species Scaled: (Sold subject to scale; overruns at bid price)

Species Sold Area Estimate: Oak

Operability: Frozen Conditions Only Soil Type: Sandy, Loamy, Moderately Drained

Topography: Level to Rolling Cutting Acres: 43.2

Harvest Specifications

Access
Access is thru public land.

Harvest and Reserves
Harvest: Oak.
Reserve: All species besides Oak.
Randomized skidding is required. Permit Holder must skid over the entire sale to flatten existing advanced regeneration.

Landings, Access Roads, and Skid Trails
Use only existing access roads.
Trails and landings need to be rehabilitated to a satisfactory condition before performance guarantee is returned.
Some major skid trails or access roads need to be closed and/or blocked following harvesting operations at sale administrator's request.
Access road is also a Grant-In-Aid Snowmobile Trail. A 4 inch snow pack must be maintained over the road where practical and when snow conditions are favorable.

Cutting, Felling, and Skidding
Damage exceeding 5% of the total residual trees per cutting block constitutes excessive damage and will be charged double stumpage. Damage is defined as injury to 30% or more of the crown or greater than 60 square inches of the layer beneath the bark of any tree.
Reduce stump heights to an average of 12".
Reserve all non-hazardous snags.
Avoid felling timber into areas of regeneration.
Do not fell timber into wetlands or across ownership boundaries.

Site, Soil, and Water Protection
Filter strips along wetlands require <5% soil disturbance.
RMZs along open water wetland(s) occur on this permit. See appriasal map for locations.
Incorporate water diversion practices to reduce soil erosion.
If site/soil damage becomes apparent, cease operations and contact sale administrator immediately.
No cutting is allowed within RMZs on this permit.

Slash Disposal
Slash may be chipped or must be scattered throughout permit area.
Chipping is to occur either simultaneously or during the same season as harvesting operations.
If chipping, 20% of the tops and limbs must be scattered throughout permit area per Site Level FMGs. This is in addition to incidental breakage.

Tree Size, Marketing, and Special Conditions
Timber must be removed from site by the end of the same season as harvesting operations.
Oak: 14" DBH - 6 Sticks.
Biomass volume is estimated to be 140 tons.

Operability: Winter Only - Frozen Ground: December 31 - March 31 Soil Type: Loam fine sandy loam, moderately well drained

Topography: Level to Rolling Cutting Acres: 87.5

Harvest Specifications

Access
Access is thru public land.

Harvest and Reserves
Harvest: Aspen, Maple, Basswood, Ash, and Paper Birch.
Reserve: Conifers, Oak, and Yellow Birch.

Landings, Access Roads, and Skid Trails
Location and construction of any new roads/landings must be pre-approved by the sale administrator.
Trails and landings need to be rehabilitated to a satisfactory condition before performance guarantee is returned.
Some major skid trails or access roads need to be closed and/or blocked following harvesting operations at sale administrator's request.
Surface material may be needed on access road(s). Permittee is responsible for providing.

Cutting, Felling, and Skidding
Utilize all timber felled during road/trail construction.
Damage exceeding 5% of the total residual trees per cutting block constitutes excessive damage and will be charged double stumpage. Damage is defined as injury to 30% or more of the crown or greater than 60 square inches of the layer beneath the bark of any tree.
Reduce stump heights to an average of 12".
Reserve all non-hazardous snags.
Avoid felling timber into areas of regeneration.
Do not fell timber into wetlands or across ownership boundaries.

Site, Soil, and Water Protection
Filter strips along wetlands require <5% soil disturbance.
Incorporate water diversion practices to reduce soil erosion.
If site/soil damage becomes apparent, cease operations and contact sale administrator immediately.

Slash Disposal
Slash may be chipped or must be scattered throughout permit area.
Chipping is to occur either simultaneously or during the same season as harvesting operations.
If chipping, 20% of the tops and limbs must be scattered throughout permit area per Site Level FMGs. This is in addition to incidental breakage.

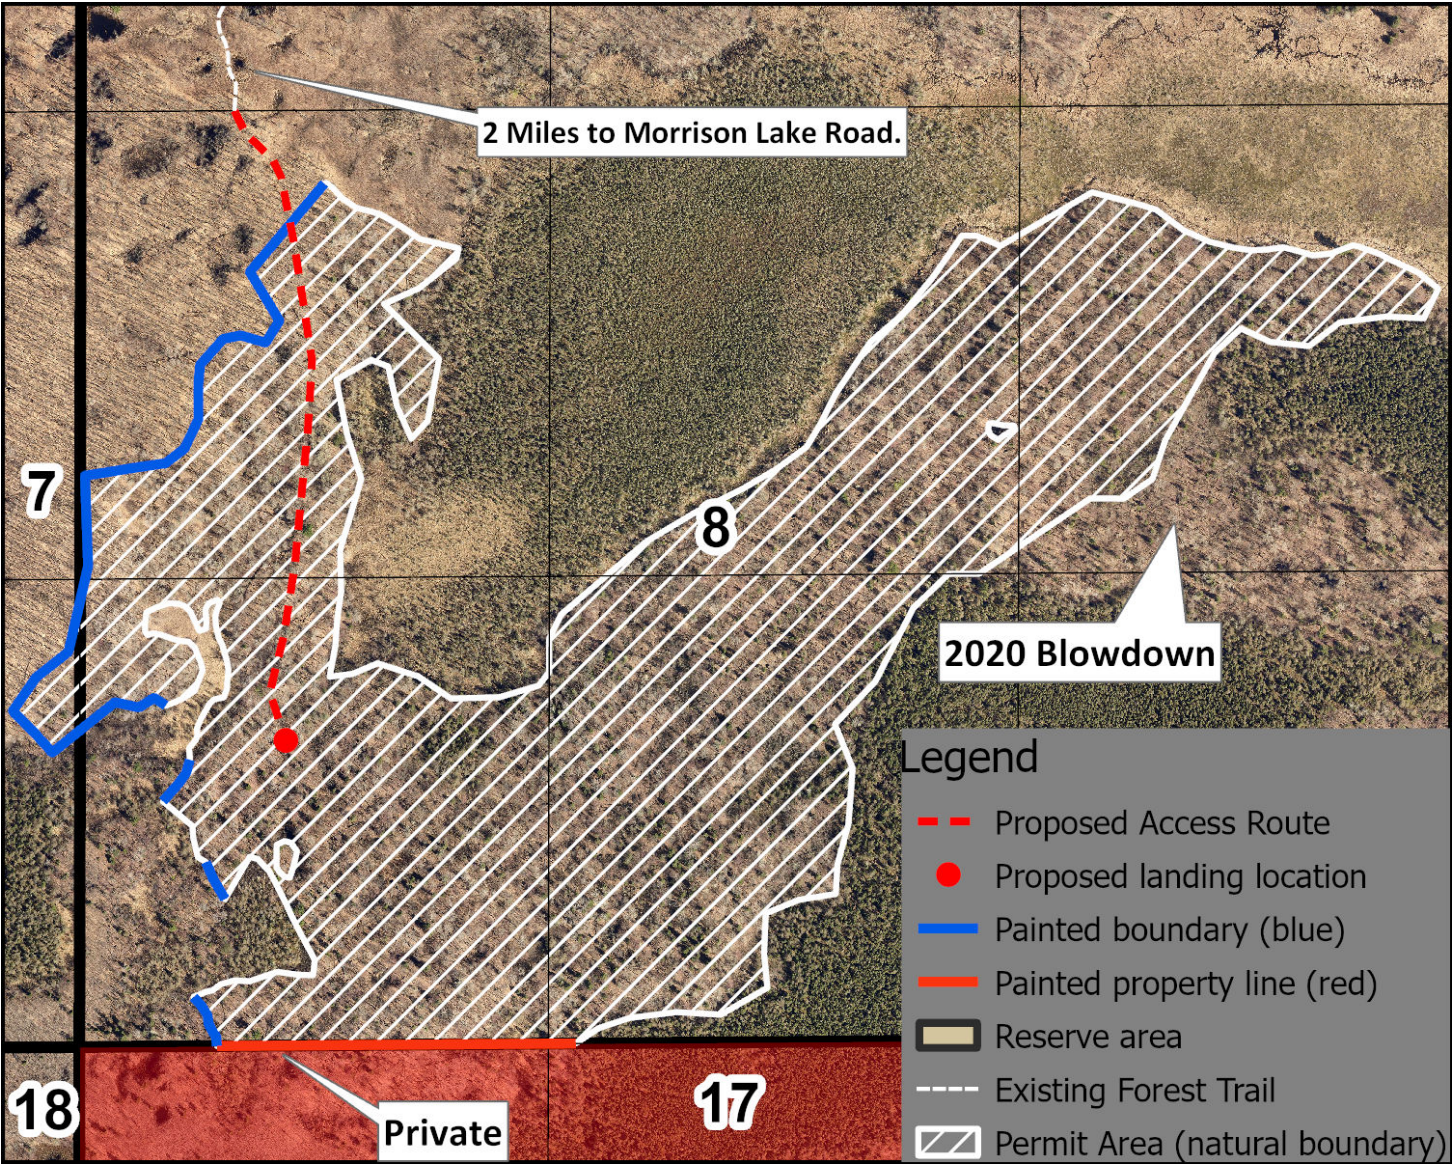

Tree Size, Marketing, and Special Conditions
Timber must be removed from site by the end of the same season as harvesting operations.
Average Tree Sizes: Aspen: 16" DBH - 7 sticks, Red Maple: 10" DBH - 4 sticks, Paper Birch: 11" DBH - 4 sticks, Ash: 12" DBH - 4 sticks, Basswood: 13" DBH - 4 sticks.
Biomass volume is estimated to be 530 tons for dirty chipping and 250 tons for clean chipping.

Other Remarks
Missing scale tickets will be charged \$50.00 per ticket book. In the case where the County receives a copy of the book stub, but no copy or record of the consumer stub, the Permittee will be charged for a full truckload of timber for that species based on the average size load.

Harvest Specifications

Access
Access is thru public land.

Harvest and Reserves
Harvest: All Oak without paint rings, Aspen, Ash, Basswood, Birch, and Maple.
Reserve: Oak with paint rings and Conifers

Landings, Access Roads, and Skid Trails
Location and construction of any new roads/landings must be pre-approved by the sale administrator.
Trails and landings need to be rehabilitated to a satisfactory condition before performance guarantee is returned.
Some major skid trails or access roads need to be closed and/or blocked following harvesting operations at sale administrator's request.

Cutting, Felling, and Skidding
Utilize all timber felled during road/trail construction.
Damage exceeding 5% of the total residual trees per cutting block constitutes excessive damage and will be charged double stumpage. Damage is defined as injury to 30% or more of the crown or greater than 60 square inches of the layer beneath the bark of any tree.
Reduce stump heights to an average of 12".
Reserve all non-hazardous snags.
Avoid felling timber into areas of regeneration.
Do not fell timber into wetlands or across ownership boundaries.
Full tree skidding is required on this sale.

Site, Soil, and Water Protection
Temporary water/wetland crossing needed on one or more locations. Remove crossing when harvesting activity is completed.
Filter strips along wetlands require <5% soil disturbance.
RMZs along open water wetland(s) occur on this permit. See appriasal map for locations.
Incorporate water diversion practices to reduce soil erosion.
If site/soil damage becomes apparent, cease operations and contact sale administrator immediately.
No cutting is allowed within RMZs on this permit.

Slash Disposal
Slash may be chipped or must be scattered throughout permit area.
Chipping is to occur either simultaneously or during the same season as harvesting operations.
100% of the tops and limbs can be removed on this sale for chipping.

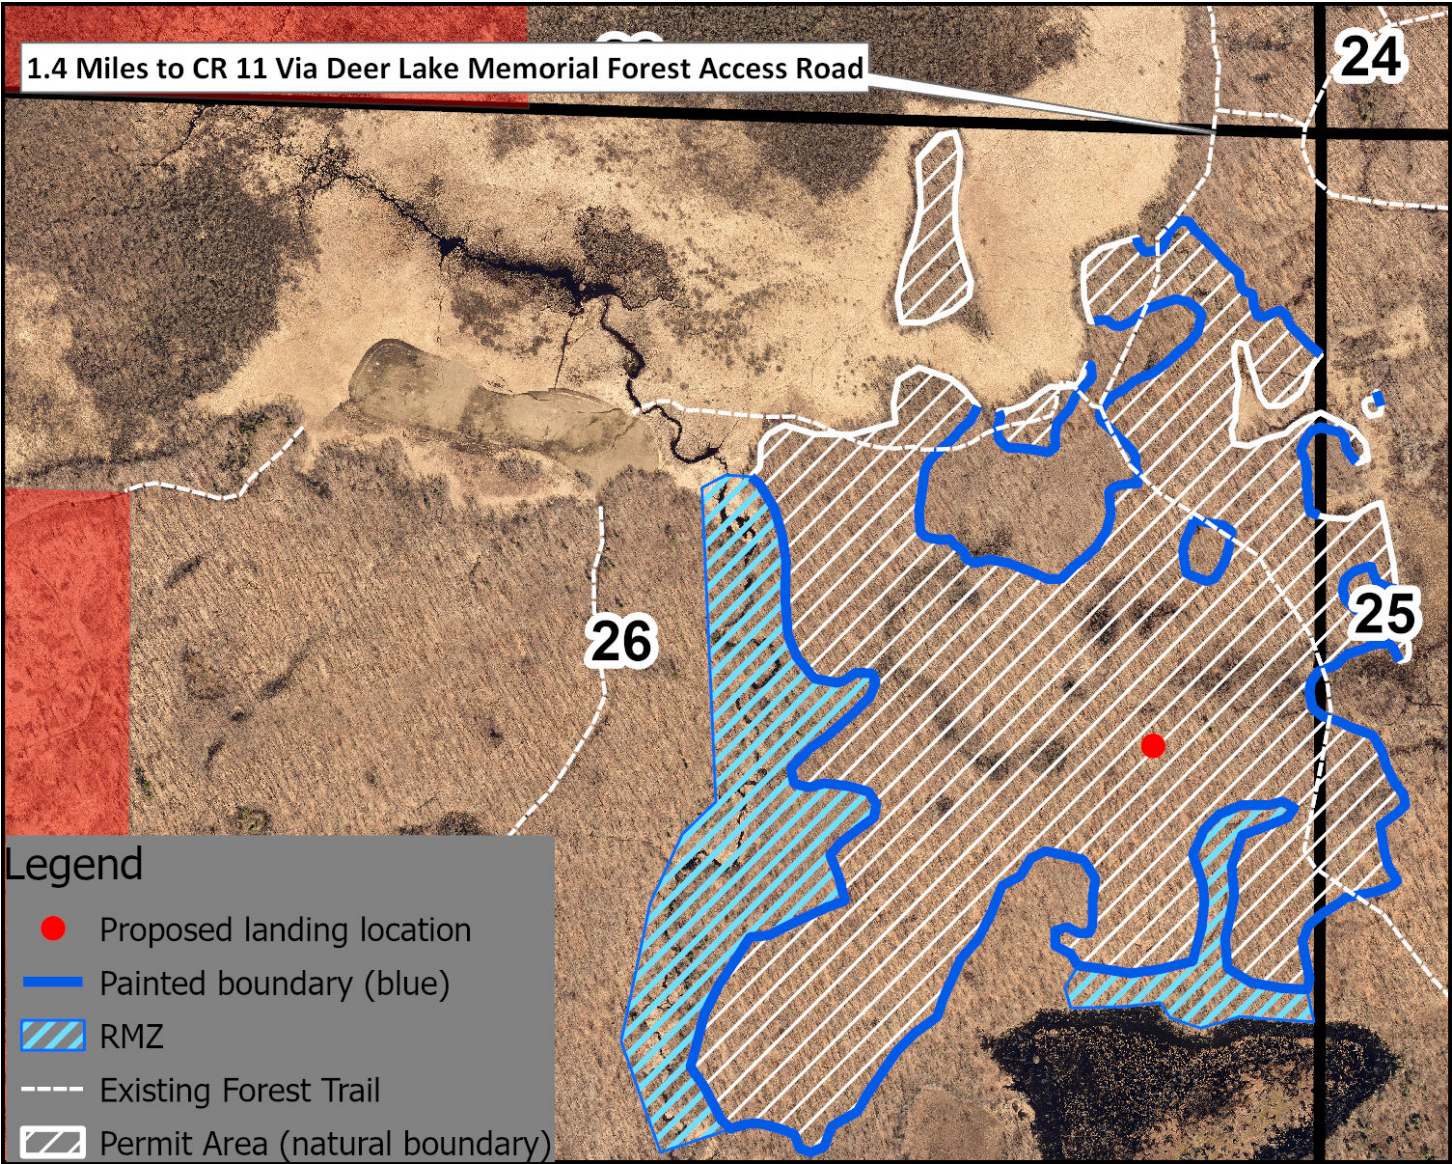

Tree Size, Marketing, and Special Conditions
Timber must be removed from site by the end of the same season as harvesting operations.
Average Tree Sizes: Red Oak: 18" DBH - 5 stick. Aspen: 9" DBH - 4 stick. Birch: 15" DBH - 5 stick. Red Maple 8" DBH - 3 stick. Basswood 12" DBH - 4 stick. Ash: 9" DBH - 4 stick.
Biomass volume is estimated to be 785 tons.

Other Remarks
There are different colors of paint throughout this sale in forms of red slash marks, orange slash marks, red rings, and blue rings. This is a result of a timber marking training. Trees with paint rings are NOT to be harvested.

If chipping, 20% of the tops and limbs must be scattered throughout permit area per Site Level FMGs. This is in addition to incidental breakage.

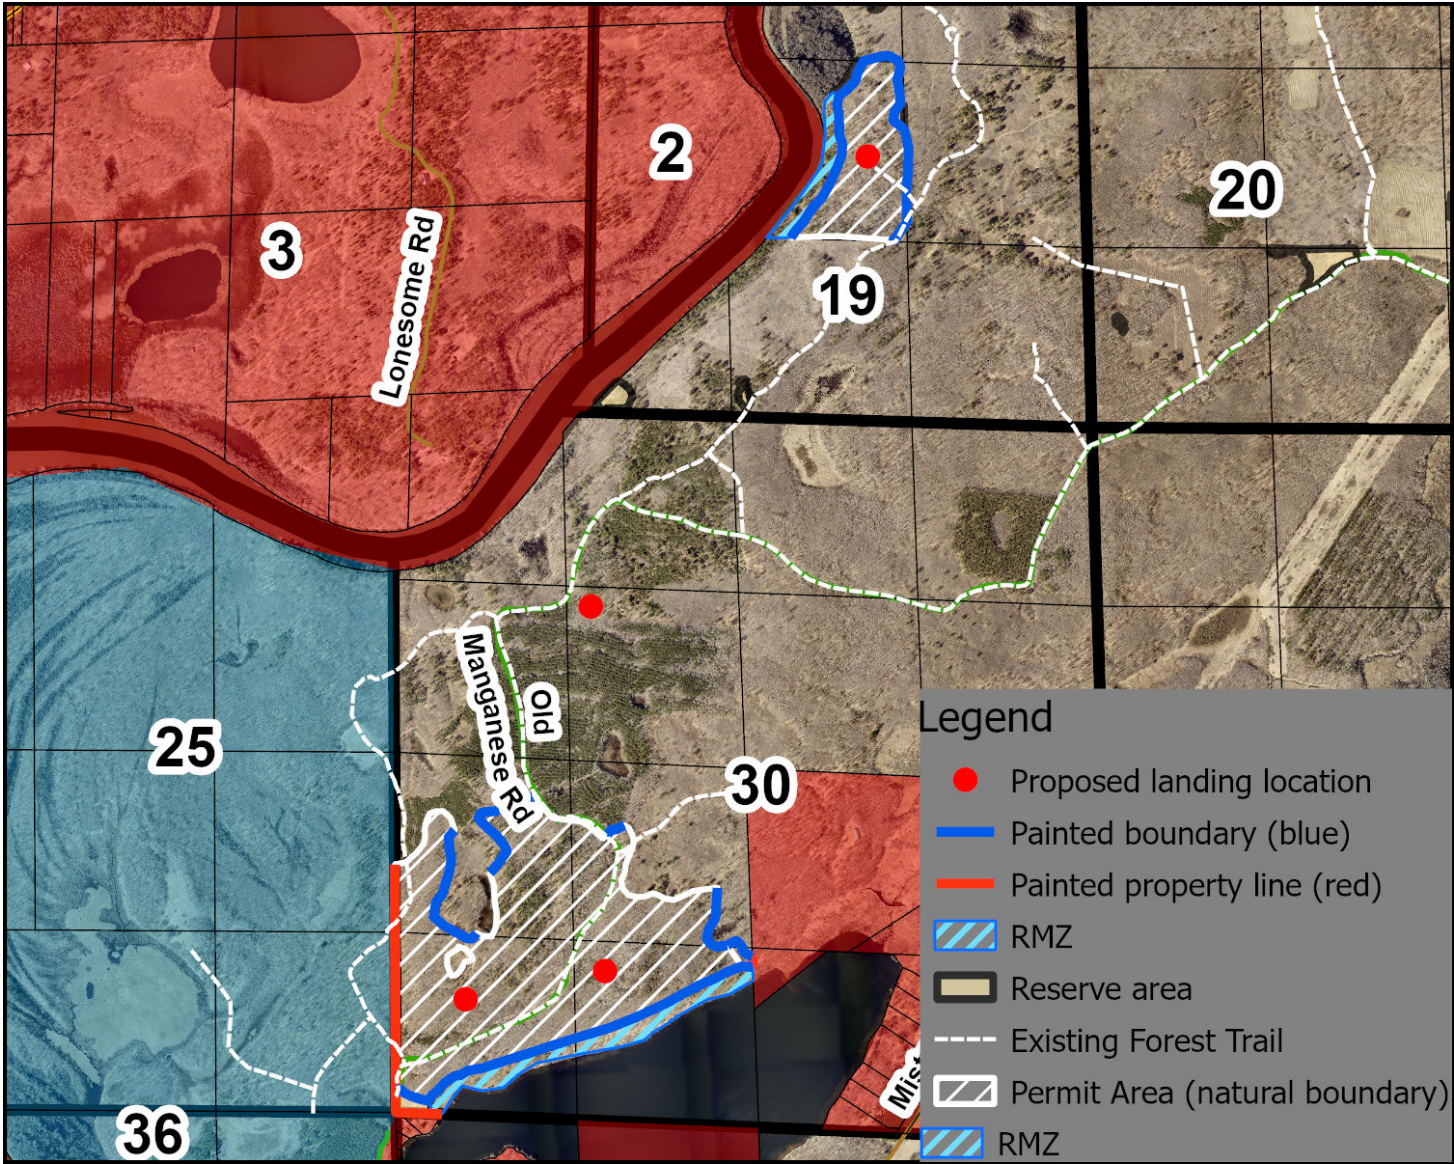

Tree Size, Marketing, and Special Conditions
Timber must be removed from site by the end of the same season as harvesting operations.
Aspen: 11" DBH - 6 Sticks, Birch: 9" DBH - 4 Sticks, Maple: 8" DBH - 3 Sticks, Jack Pine 10" DBH - 5 Sticks.
Biomass volume is estimated to be 810 tons for dirty chipping and 75 tons for clean chipping.

Other Remarks
Missing scale tickets will be charged \$50.00 per ticket book. In the case where the County receives a copy of the book stub, but no copy or record of the consumer stub, the Permittee will be charged for a full truckload of timber for that species based on the average size load.

							Subtotal	\$34,215.00
							Total	\$34,215.00
Total MBF: 0				Total Cords: 1205				

Species Scaled: (Sold subject to scale; overruns at bid price) Aspen, Red Pine
Species Sold Area Estimate: Jack Pine, Mixed Hardwood

Operability: Summer: May 15 - March 31 **Soil Type:** Loam fine sandy loam, moderately well drained
Topography: Level **Cutting Acres:** 53.9

Harvest Specifications

Access
Access is thru public land.

Harvest and Reserves
Harvest: Marked Red Pine, Aspen, Jack Pine, Birch, Maple, and Basswood.
Reserve: Unmarked Red Pine, White Spruce, and Oak.

Landings, Access Roads, and Skid Trails
Location and construction of any new roads/landings must be pre-approved by the sale administrator.
Trails and landings need to be rehabilitated to a satisfactory condition before performance guarantee is returned.
Some major skid trails or access roads need to be closed and/or blocked following harvesting operations at sale administrator's request.
Surface material may be needed on access road(s). Permittee is responsible for providing.
Access road is also a Grant-In-Aid Snowmobile Trail. A 4 inch snow pack must be maintained over the road where practical and when snow conditions are favorable.

Cutting, Felling, and Skidding
Damage exceeding 5% of the total residual trees per cutting block constitutes excessive damage and will be charged double stumpage. Damage is defined as injury to 30% or more of the crown or greater than 60 square inches of the layer beneath the bark of any tree.
Reduce stump heights to an average of 12".
Do not fell timber into wetlands or across ownership boundaries.

Site, Soil, and Water Protection
Filter strips along wetlands require <5% soil disturbance.
Incorporate water diversion practices to reduce soil erosion.
If site/soil damage becomes apparent, cease operations and contact sale administrator immediately.

Slash Disposal
Slash may be chipped or must be scattered throughout permit area.
Chipping is to occur either simultaneously or during the same season as harvesting operations.
If chipping, 20% of the tops and limbs must be scattered throughout permit area per Site Level FMGs. This is in addition to incidental breakage.

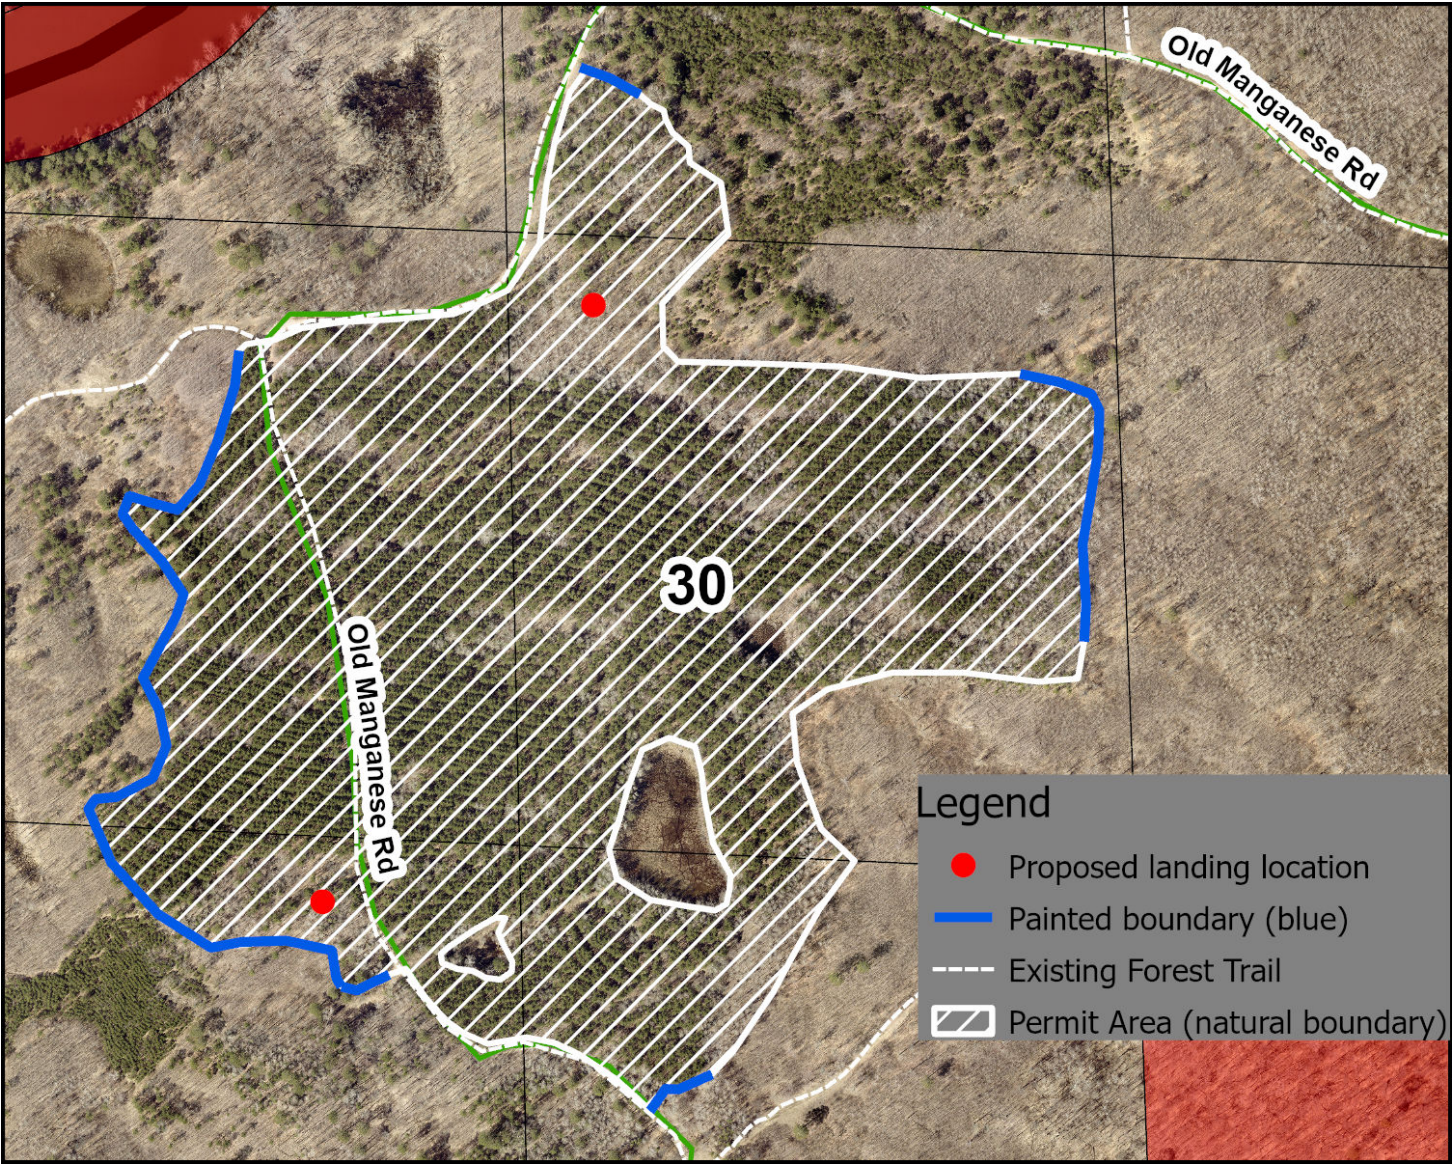

Tree Size, Marketing, and Special Conditions
Timber must be removed from site by the end of the same season as harvesting operations.
Aspen 10" DBH 4.5 sticks, Birch 8" DBH 3 sticks, Maple 7" DBH 3 sticks, Jack Pine 8" DBH 4 sticks, Red Pine 9" DBH 4 sticks.
Biomass volume is estimated to be 360 tons for dirty chipping or 50 tons for clean chipping.

Other Remarks
Missing scale tickets will be charged \$50.00 per ticket book. In the case where the County receives a copy of the book stub, but no copy or record of the consumer stub, the Permittee will be charged for a full truckload of timber for that species based on the average size load.

Harvest Specifications

Access
Access is thru public land.
Harvest and Reserves
Harvest: Aspen, Birch and Maple.
Reserve: Oak, Ash, Basswood, Conifers and Cherry.
Landings, Access Roads, and Skid Trails
Location and construction of any new roads/landings must be pre-approved by the sale administrator.
Trails and landings need to be rehabilitated to a satisfactory condition before performance guarantee is returned.
Some major skid trails or access roads need to be closed and/or blocked following harvesting operations at sale administrator's request.
Access roads are also Grant-In-Aid Ski Trails. All roads and skid trails must be cleared and repaired before November 1st.
Cutting, Felling, and Skidding
Utilize all timber felled during road/trail construction.
Damage exceeding 5% of the total residual trees per cutting block constitutes excessive damage and will be charged double stumpage. Damage is defined as injury to 30% or more of the crown or greater than 60 square inches of the layer beneath the bark of any tree.
Reduce stump heights to an average of 12".
Reserve all non-hazardous snags.
Do not fell timber into wetlands or across ownership boundaries.
Site, Soil, and Water Protection
Filter strips along wetlands require <5% soil disturbance.
Incorporate water diversion practices to reduce soil erosion.
If site/soil damage becomes apparent, cease operations and contact sale administrator immediately.
Slash Disposal
Slash may be chipped or must be scattered throughout permit area.
Chipping is to occur either simultaneously or during the same season as harvesting operations.
If chipping, 20% of the tops and limbs must be scattered throughout permit area per Site Level FMGs. This is in addition to incidental breakage.
Tree Size, Marketing, and Special Conditions
Timber must be removed from site by the end of the same season as harvesting operations.
Aspen: 10" DBH - 6.5 Sticks, Birch: 9" DBH - 5 Sticks, Maple: 9" DBH - 4 Sticks.
Biomass volume is estimated to be 265 tons for dirty chipping and 40 tons for clean chipping.
Other Remarks
Missing scale tickets will be charged \$50.00 per ticket book. In the case where the County receives a copy of the book stub, but no copy or record of the consumer stub, the Permittee will be charged for a full truckload of timber for that species based on the average size load.
