

# Protecting Sensitive Shoreland Habitats In North Central Minnesota

**Project ID: H-06**

## A collaborative project of:

- Leech Lake Area Watershed Foundation
- Minnesota Land Trust
- Aitkin, Crow Wing, and Cass Counties
- Local lake associations

**To protect critical fish and wildlife habitat on key recreational lakes threatened by increasing shoreland development.**

## What is this proposal to L-SOHC about?

This request for \$2.06 million will help protect sensitive shorelands in the heart of Minnesota's premier lake country to insure continued fishing, hunting, and other recreational opportunities; economic sustainability for a region dependent on tourism; and a legacy for future generations to enjoy. It will leverage \$8 to \$10 million in donated property value from conservation-minded Minnesotans.

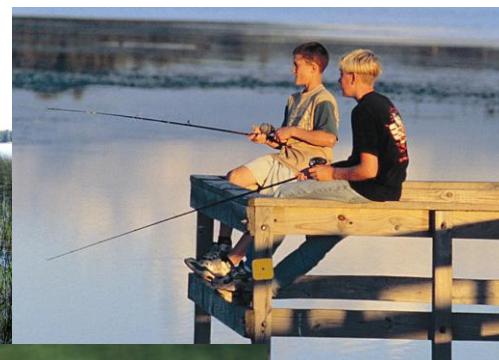

## What will be accomplished?

- Complete 20-25 conservation easement projects
- Protect 50,000 + feet of critical shoreline habitat
- Preserve 1,200 acres+ of northern forest habitat
- Allow public access where feasible and appropriate
- Ensure perpetual monitoring and enforcement
- Form lasting partnerships for conservation

## How will this support the State's goals?

This program reflects goals of L-SOHC, Aquatic Management Area Plan, Duck Plan, Wildlife Conservation Strategy, County Water Plans, and many others. It prioritizes protecting high-quality fish habitat, maintains wooded shoreline key to waterfowl production and other game and non-game species, and helps to protect wildlife species of greatest conservation need.
